Abstract
Progress achieved in most technologies is closely related to progress in advanced materials. The paper deals with the priorities of the materials research in the Czech Republic and EU- working programm 2013 in the priority 4. of the 7th FP and program HORIZON 2020. There are described materials for key enabling technologies (KETs). In the field of advanced materials is necessary to strengthen approaches to the rational design and characterisation of advanced materials and their integration into structures and systems.
